TRYBUZZCALL · BUZZCALL

Go-to-Market & Marketing Strategy

$49 deposit in your account before you're off the ladder.

trybuzzcall.com · Atlanta, GA · Prepared Oct 19, 2026 · 90-day window: Mon Oct 26, 2026 → Sat Jan 23, 2027 · Starting budget $300–550 · Pre-launch

> **How to read this.** Targets are **goals, not predictions**. Anything marked **(est.)** is an estimate or assumption to replace with your own numbers. Outside stats are limited to three sources (cited in §13). Everything else is either your own product facts or a published price/date that you should re-check before you spend money.

0. Executive summary

1. **Don't sell text-back.** It's built into GoHighLevel, Podium, Birdeye, Weave, Jobber, Housecall Pro and ServiceTitan. Sell **booked, paid jobs**: "$49 deposit in your account before you're off the ladder."
2. **Who to sell to:** Georgia plumbing and HVAC shops with 1–5 trucks that schedule by phone, paper or a calendar, *not* field-service software. Start with plumbers in the suburbs and small towns, not intown Atlanta HVAC, where BookedBack is already selling.
3. **Offer:** free 14-day pilot, then $49/mo plus $12 only when a caller books *and* pays. Add a suggested **"Paid job in 30 days or the month is free"** guarantee. No one else in the research pairs a guarantee with pay-per-paid-lead pricing.
4. **Channel #1, the after-hours missed-call demo:** call the shop after hours, note that nobody picked up and nothing texted back, then show them on *their own* phone what their caller would have gotten. It's free, it's proof, and it's the product doing its own pitch.
5. **Channel #2, in person:** supply-house counters at 6:30–8am, PHCC of Georgia meetings and CE classes. **Channel #3:** a referral and partner program that turns pilots into introductions.
6. **90-day goals:** 400 shops contacted, 15–18 pilots, 10 paying shops, 2–3 real case studies, all for **under $500** (planned spend about $450, est.).
7. **Biggest risks to manage up front:** TCPA (don't cold-text prospects), A2P 10DLC registration time and per-shop cost, the "keep your number" claim (texts may come from a new local number), and seasonal churn.
8. **Fix before you contact anyone:** the site, pitch sheet and outreach kit still say **$79–149/mo + $99 setup** and use the "bytspot" name. Change them to the $49 + $12 model and the TryBuzzCall/BuzzCall brand.

1. Positioning, core message, offer

One-line positioning

> BuzzCall turns the calls you miss into booked, paid jobs for Georgia plumbers and HVAC shops. We set it up for you, you keep your number, and there's no app.

Core message (the one sentence every asset lands on)

> **"$49 deposit in your account before you're off the ladder."**

Three proof points (always in this order)

1. **Booked + paid, not just texted.** The caller picks one of 3 open slots and pays a $49 deposit, credited to their bill. Your phone buzzes: **BOOKED + PAID**, with urgent jobs flagged.
2. **Done for you.** Same number for callers, plain text messages, no app or dashboard. We handle setup and the carrier texting registration.
3. **Local.** A real person in Georgia, in-person setup, and ready-made scripts for heat waves (AC out), cold snaps (no heat) and freezes (burst pipes).

What we never lead with: "missed-call text-back," "AI," or competitor names. Text-back is the plumbing; the deliverable is a paid booking.

The offer

Piece	What it is	Why it beats the field
Free 14-day pilot	No card to start. Live on their line, real callers.	Matches or beats rivals' trials. CatchMissed charges $149 setup.
$49/mo base	Same as Operator's starting price.	Price parity with the closest rival, much lower than $79–149 rivals.
+$12 per paid lead	Charged **only** when a caller books **and** the deposit clears.	"You only pay extra after you've been paid." That's rare in this market.
Setup waived on annual	Setup fee waived with a 12-month commitment.	Rewards commitment and cuts winter churn.
Guarantee (suggestion)	**"Paid job in 30 days or the month is free."** If BuzzCall doesn't produce at least one paid booking in a shop's first paid 30 days, refund or skip that $49.	Takes away the last bit of risk. It costs you little (see below).
Founding Shop deal (suggestion)	First 10 paying shops lock $49/mo for life in exchange for a case study and a reference call.	Buys proof cheaply and creates urgency ("10 spots").

Why the guarantee is cheap for you (est.): if a shop gets zero paid bookings, you've lost one $49 month. Those are the same shops that would churn anyway, so the guarantee mostly costs you revenue you wouldn't have kept. Put it in writing with a simple definition: "paid booking = a caller deposit that cleared and wasn't refunded because the shop cancelled."

Optional fear reducer (suggestion): cap lead fees per month (example: no more than 15 × $12 = $180). Most small shops won't hit the cap, and it answers "what if it gets expensive?"

2. Ideal customer profile (ICP)

Best fit (score 1 point each; pursue at 4+):

- ☐ Plumbing or HVAC, licensed in Georgia (verify on the SOS license lookup)
- ☐ 1–5 trucks; the owner still runs calls or answers the phone
- ☐ Schedules by phone, paper, Google Calendar or a whiteboard. **Not** on Jobber, Housecall Pro or ServiceTitan.
- ☐ Missed your after-hours test call **and** sent no text-back
- ☐ Owner's cell is the business line, or calls ring to one person
- ☐ Does emergency or same-day work (water heaters, leaks, no-heat, no-AC)
- ☐ Google Business Profile with reviews but no online booking button

Poor fit (skip or deprioritize):

- Already on field-service software. They can turn on built-in text-back (Jobber sells it as a $29 add-on).
- Has an answering service or office staff answering live during business hours.
- 10+ trucks with a dispatcher (a different buyer, longer sale).
- New construction-only or commercial-only shops (few homeowner emergency calls).

Where to start geographically: plumbers in metro suburbs outside the core city (Cobb, Gwinnett, Cherokee, Henry, Douglas, Paulding) and mid-size Georgia towns you can drive to (Macon, Athens, Gainesville). Reason: BookedBack is positioned on Atlanta HVAC. Go where small shops are thick and attention is less crowded. Add HVAC in the same suburbs once you have one plumbing case study.

Persona: "Darnell, owner of a 2-truck plumbing shop in Marietta." Answers his own cell. Under a house from 8 to 5. Calls back voicemails at night, and some of those callers have already hired someone else. Hates software and contracts. Trusts other plumbers, his supply-house counter guy, and people who show up in person.

How to find them (free first)

Source	How to use it	Cost
Google Maps	Search "plumber near Marietta GA", "water heater repair Kennesaw", "HVAC repair Lawrenceville". Log name, phone, website, review count, hours, and whether there's a "Book online" button. Fewer than ~150 reviews and no booking button is the sweet spot (est. heuristic).	Free
GA Secretary of State license lookup (goals.sos.ga.gov / verify.sos.ga.gov)	Verify each shop is licensed (Plumbers; Conditioned Air Contractors). Use the license holder's name to find the owner.	Free
GA SOS license rosters (georgiasecretaryofstate.net)	Statewide rosters: Master Plumber Restricted **$50**, Non-Restricted **$100**; Conditioned Air Restricted/Non-Restricted **$100** each. They include name, city, ZIP, county and license dates, but **no phone numbers or emails**, and statewide only.	$50–100. **Skip for 90 days**; Maps gives you phones for free.
Supply-house counters	Ask counter staff which small accounts are "always on a job and can't pick up."	Free + donuts
PHCC of Georgia member events	Meet owners in person (see §3.2).	Price of dinner
Facebook groups	Local trade and contractor groups; town "recommend a plumber" groups show who's busy.	Free
Nextdoor / town groups	Note shops that get recommended a lot but are hard to reach.	Free

Tracking sheet columns: shop · owner · city · county · trade · trucks (guess) · phone · website · reviews · booking button (Y/N) · FSM software seen (Y/N) · after-hours test date/time · answered (Y/N) · text-back received (Y/N) · next step · consent to text (Y/N + how) · status.

3. Top 3 channels, ranked

Rank	Channel	Why this rank	Cost
1	After-hours missed-call demo	Proves the problem with *their* phone. Solo-friendly, scalable, free.	Phone time
2	In-person: supply houses + trade groups	Highest trust and close rate in a local, word-of-mouth trade; slower per contact.	Gas, dinners, printing
3	Referral & partner program	Compounds, but needs proof first. Weak in month 1, strong by month 3.	Paid from revenue

Not in the first 90 days: paid Google/Facebook ads (budget too small to learn anything), buying lead lists, cold SMS blasts (compliance risk, see §11).

3.1 Channel #1: the after-hours "missed-call demo"

The idea: you become their missed caller. Then you show them exactly what that caller should have gotten, using a live demo line.

Prerequisite: a working demo line. A Twilio number (upgraded from trial, 10DLC-registered under TryBuzzCall) set up as a sample shop, e.g. "Peach State Plumbing (BuzzCall demo)". The prospect calls it, lets it ring out, gets the text, picks a slot, and pays a **Stripe test-mode** deposit. *Product tweak to request (suggestion):* a demo mode that sends the "BOOKED + PAID" buzz to the **prospect's own phone** too, so they feel both sides in 60 seconds. Because the prospect calls or texts the demo line first, replying to them is a response, not a cold text.

Step-by-step

1. **Build a batch** of 30–40 shops from Google Maps (§2) every Monday.
2. **Make the test call after hours but inside normal calling hours:** weekdays **6:00–8:45pm local**, or Saturdays 9–11am. (Staying between 8am and 9pm is the federal TCPA telemarketing window. Respect it even when calling businesses.) Dial manually from your own phone. No autodialer, no robocalls.
3. **Log the result:** answered / voicemail / full mailbox / text-back received (and how many minutes later). Don't leave a sales voicemail on this first call; it's a test.
   - If they **answered**: give the 20-second pitch (script below) or ask for a better time.
   - If they **already have text-back**: lower priority. The pitch becomes "you're texting them back; are they booking and paying?"
4. **Next business day, reach them a different way.** The best windows (est.) are 7:00–7:45am, before trucks roll, or 12:00–1:00pm. Call, email if the website lists one, or walk in if they're nearby.
5. **The reveal script (phone, about 45 seconds):**

   > "Hey {first}, {you} with BuzzCall, here in Georgia. Quick one: I called {shop} last night at {time}. It went to voicemail and nothing came back. Not a knock, you were off the clock. But a homeowner with a leak would've called the next name on Google. Want to see what they'd have gotten instead? Call this number right now and just let it ring: **[demo line]**. You'll get a text, pick a time, and see the 'BOOKED + PAID' alert. Takes a minute. If you like it, I'll set it up on your line free for 14 days."

6. **Voicemail version (only on the follow-up call, 20 seconds):**

   > "{first}, {you} with BuzzCall in Georgia. I called your shop last night at {time} and it went to voicemail, which is exactly when customers drift to the next plumber. Call **[demo line]** and let it ring to see what your callers could get: a text, a booked slot, and a $49 deposit. My cell is [your phone]. Thanks."

7. **Email version** (if a public business email is listed). Subject: *"I called {shop} at {time} last night"*. Body: the reveal script, the demo line, the pilot offer, and an opt-out line ("Reply 'no thanks' and I won't email again").
8. **Cadence:** Day 0 test call → Day 1 reveal call/email → Day 3 walk-in if within 20 minutes, or a 2nd call → Day 7 last call. Then move them to a quarterly check-in list. **Text them only if they've texted you, called the demo line, or said "text me."**
9. **Close:** "I just need your cell, your hours, and 20 minutes to set it up. In person if you like." Book the setup on the spot.

Bonus content from this channel (real data you generate): after 50+ test calls, publish **"We called 50 Cobb County plumbers after 6pm. Here's what happened."** Report only your own counts (answered / voicemail / text-back), plus how you sampled and when. Label it as your own small sample, not an industry stat. That's local PR, a Facebook post, and a sales opener in one.

3.2 Channel #2: in person (supply houses + trade groups)

Supply houses (weekly, Tue–Thu)

- *Targets:* plumbing and HVAC distributor branches near your target counties (e.g., Ferguson, Winsupply, Johnstone Supply, Shearer Supply, Carrier Enterprise, local independents). Confirm addresses on Google Maps.
- *When:* **6:30–8:00am**, when trucks load up (est.; ask the counter staff when it's busiest and when it's quiet).
- *Playbook:*
  1. **Visit 1, the branch manager, during a quiet hour.** Not a pitch, a favor: "I help small plumbing shops stop losing after-hours calls. Could I put a sheet on your board? Which of your small accounts can never pick up?" Bring a dozen donuts (about $15, est.).
  2. **Leave 10 pitch sheets** at the counter, with a QR code to the demo line and your cell.
  3. **Visit 2+, at the morning rush.** Stand *outside* or by the coffee, never blocking the counter. Ask one question: "How many calls do you miss while you're on a job?" Hand the sheet only if they engage.
  4. **Offer the branch something:** "If any of your accounts sign up, I'll tell them you sent them." (Supply houses like being useful to their contractors.) Later this can become a formal partner (§3.3).
- *Goal:* 2 supply-house branches per week, same ones repeatedly. Familiarity is the point.

Trade groups and events (verify dates before going)

Event	Details (as listed on organizer sites, Oct 2026)	Action
PHCC of Georgia, Metro Atlanta meeting	2nd Tuesday monthly, 5–7pm, Laseter's Tavern, 4355 Cobb Pkwy SE, Atlanta 30339. Cost: price of dinner. Listed: **Nov 10**. Dec 8 and Jan 12 inferred from the 2nd-Tuesday pattern. **Confirm.**	Attend every month. Introduce yourself to the EVP (office 678-947-3473) beforehand. Offer to give 5 minutes on "after-hours calls" in the News segment, or to sponsor a dinner later.
PHCC GA CE classes	IPC/IFGC amendment CE, Marietta, **Sat Oct 24** and **Sat Nov 7**, 8am–noon.	Ask PHCC if you can leave sheets or say hello at the break. Don't hard-sell in a classroom.
PHCC GA Holiday Luncheon	**Dec 9**, 10:30am–1:30pm (listed).	Attend if it's open to non-members/industry partners. Ask first.
PHCC GA plumbing license renewal	Listed **Nov 30**.	A timely Facebook post about the renewal deadline. Not a sales hook.
CAAG (Conditioned Air Association of Georgia) Fall Seminar	Listed Nov 18, Macon. Registration about $265+.	**Probably skip** (budget). Email CAAG to ask about exhibitor or partner rates for 2027.
PHCC GA EXPO	Apr 15, 2027, Cobb Civic Center (outside 90 days).	Plan a booth or partner slot for spring, ahead of AC season.

In-person rules: be the helpful local, not a vendor. Talk about their busiest season and their worst missed call. Carry the demo line on a card. Follow up the same day: "Good meeting you at Laseter's. Here's the demo line."

3.3 Channel #3: referral & partner program

Customer referrals: "Buzz a buddy" (start the day a pilot sees its first paid booking)

- Ask at the **moment of delight**, right after the first BOOKED + PAID alert: "Who's another plumber or HVAC guy you'd want to have this?"
- **Reward (suggestion):** referrer gets **one free month** ($49 credit) when the referred shop's first paid month clears. The referred shop gets the guarantee plus an extended 21-day pilot. Cash is tight, so pay in credit, not cash.
- Plumbers often know HVAC owners (and vice versa) who aren't competitors. Ask for the *other* trade.
- Script: "Glad it's working. Most of my shops come from guys like you. Know one plumber or HVAC owner who misses calls? I'll set him up free and give you next month free if he sticks."

Partners (people who already have small-shop owners' trust)

Partner type	What they get (suggestion)	Ask
Bookkeepers / tax preparers for trades	$50 per shop that pays 2 months, or 15% of the base for 12 months	"When clients complain about missed calls, hand them this."
Web designers / Google Business Profile & SEO freelancers	Same, or a co-branded "booking upgrade" they can resell	Bundle with site builds. They drive calls, you convert them.
Supply-house branch staff	Recognition plus coffee or lunch for the counter. Ask about company gift rules first.	Flyer on the board, warm intros
Contractor insurance agents	Same as bookkeepers	Intro email to their trade clients
Non-competing trades (electricians, garage door, appliance repair)	Free month per referral	Swap intros. Also future verticals.

- Pay partner rewards only **after the shop's second paid month** (protects cash and filters bad referrals).
- Keep one simple tracker: partner · referred shop · date · status · reward owed.
- Ready-made partner kit: one-page sheet, demo line, a forwardable email, and a link with `?ref=partnername`.

4. 30/60/90-day plan (goals, not predictions)

Funnel assumptions used to set goals (est.; replace with your real rates by Week 4): about 20–25% of shops contacted become a real conversation; about 30–40% of conversations agree to a pilot; about 50% of finished pilots convert to paid. Pilots can't start until each shop's 10DLC registration clears (Twilio estimates "under one week"), so line up pilots a week ahead.

Days 1–30: build the machine and get first pilots live (Oct 26 – Nov 24)

Week	Dates	Must-do	Contact goal (cum.)	Pilot goal
1	Oct 26–Nov 1	Host site on HTTPS. Upgrade Twilio. Buy demo number. Submit TryBuzzCall 10DLC brand + campaign. Stripe test mode. **Update site, pitch sheet and outreach kit to $49 + $12 pricing and the BuzzCall brand.** Build list of 150 shops. Draft pilot agreement + guarantee wording.	10 test calls (10)	—
2	Nov 2–8	Demo line live. After-hours test calls Mon–Thu. 2 supply houses. Visit PHCC CE class (Nov 7, if allowed). Record demo video (§6).	25 (35)	1 agreed
3	Nov 9–15	**PHCC Metro Atlanta, Nov 10.** Reveal calls/walk-ins. Start first shop's 10DLC.	30 (65)	3 agreed
4	Nov 16–22	First pilot live. Day-3 check-in. Ask the first partner (a bookkeeper or web designer you know).	35 (100)	5 agreed, 2 live

Day-30 goals: 100 shops contacted · 20+ real conversations · 5 pilots agreed · 2 live · demo line + video done · pricing consistent everywhere.

Days 31–60: convert pilots, start the proof engine (Nov 25 – Dec 24)

Week	Dates	Must-do	Contact goal (cum.)	Pilot / paid goal
5	Nov 23–29	Thanksgiving week: lighter outreach. Finish setups. Publish the "we called 50 plumbers" post.	20 (120)	4 live

Week	Dates	Must-do	Contact goal (cum.)	Pilot / paid goal
6	Nov 30–Dec 6	Freeze-season push: turn on the frozen-pipe and no-heat scripts. First pilot wrap-ups (Day 14).	40 (160)	6 live · **2 paid**
7	Dec 7–13	**PHCC Metro Atlanta Dec 8 (confirm)** + Holiday Luncheon Dec 9 (if open). First case study draft. Launch "Buzz a buddy."	45 (205)	8 live · 3 paid
8	Dec 14–20	Recap posts. Ask every pilot for a referral. Sign 2 partners.	45 (250)	10 started · **5 paid**

Day-60 goals: 250 contacted · 10 pilots started · **5 paying shops** · 1 written case study (with permission) · 2 partners · first referral pilot.

Days 61–90: repeat what worked, add HVAC, stack proof (Dec 21 – Jan 23)

Week	Dates	Must-do	Contact goal (cum.)	Pilot / paid goal
9	Dec 21–27	Holiday week: service current shops, write case studies. Outreach only on freeze days.	15 (265)	11 started
10	Dec 28–Jan 3	Same; plan Q1 list (HVAC in same counties).	15 (280)	12 started · 6 paid
11	Jan 4–10	Full outreach restarts. Pitch annual plans to paying shops (setup waived).	40 (320)	14 started · 7 paid
12	Jan 11–17	**PHCC Metro Atlanta Jan 12 (confirm).** Publish case study #2. Partner intros.	40 (360)	16 started · 9 paid
13	Jan 18–23	90-day review: real funnel rates, CAC, churn. Decide: more plumbing, more HVAC, or a new metro.	40 (400)	15–18 started · **10 paid**

Day-90 goals: 400 contacted · 15–18 pilots · **10 paying shops** · 2–3 case studies · 3 active partners · 2+ referral-sourced pilots · at least 2 shops on annual.

Illustration only (not a forecast): 10 shops × ($49 + 3 paid leads × $12) = **$850/month**. The formula is `MRR = shops × $49 + paid leads × $12`. Plug in your real paid leads per shop once pilots run.

Weekly rhythm (solo founder):

- **Mon:** build the batch, product fixes
- **Mon–Thu 6:00–8:45pm:** test calls
- **Tue–Thu 6:30–8am:** supply houses
- **Tue–Thu 7–7:45am and noon:** reveal calls
- **Fri:** setups, check-ins, recaps, content
- **Sat 9–11am:** test calls or walk-ins

5. Budget: under $500 for 90 days (all figures est.)

Fees below are from Twilio's published 10DLC page and the GA SOS store (Oct 2026). Other line items are rough estimates. Re-check before paying.

Item	Est. cost	Notes
Hosting (always-on Node app, ~$7/mo × 3)	$21	Webhooks can't sleep, so no free tier that idles.

Item	Est. cost	Notes
Domain trybuzzcall.com (if not yet bought)	$12	Skip if already owned.
Twilio upgrade + usage credit	$20	Covers the demo number (~$1–2/mo, est.) and SMS/voice for demos and early pilots.
TryBuzzCall's own 10DLC (demo line)	~$24	$4 low-volume brand + $15 campaign vetting + ~$1.50–2/mo × 3.
Per-pilot 10DLC registration, 10 shops	~$200	About $4 brand + $15 vetting + monthly campaign fee per shop (est. ~$20 each to start). **Confirm with Twilio** whether each client needs its own brand/campaign as an ISV. Plan on yes.
Printing: 200 pitch sheets + 250 cards with the demo-line QR	$45	Office-supply or online printer.
PHCC Metro Atlanta dinners × 3	$60	"Cost is price of dinner."
Supply-house donuts/coffee × 6	$60	Your best-ROI line item (est.).
Gas/mileage (local)	$60	Group visits by county.
Total	**≈ $502 → trim to $450**	Cut: print 100 sheets (–$20), 4 donut runs (–$20), skip domain if owned (–$12).

If you only have $300: hosting $21 + Twilio $20 + own 10DLC $24 + 5 pilot registrations ~$100 + printing $30 + 2 dinners $40 + gas $40 = **≈ $275**. Register more pilots as revenue comes in.

Not in the budget (on purpose): ads, license rosters ($50–100 each), CAAG seminar (~$265), paid tools, LLC filing. Pay for these from revenue after Day 60 if the numbers say so.

Cash protection: register a shop's 10DLC only after a signed pilot agreement. Start charging the $49 on Day 15. Consider charging setup on monthly plans to cover registration (it's already waived on annual).

6. Content

6.1 30-second demo video script (shoot on your phone, vertical 9:16)

Time	Picture	Words (voiceover or on-screen text)
0–3s	Plumber's hands under a sink, phone buzzing on the floor, unanswered.	**On-screen:** "You're under a sink. Your phone rings."
3–7s	Phone screen: "Missed call." Cut to a homeowner in a kitchen, water on the floor, phone to ear, frowning.	**VO:** "Most people who hit voicemail won't leave a message. They call the next plumber."
7–14s	Homeowner's phone: text arrives from the shop. "Sorry we missed you! What's your name and what's going on?" She types "Leaking water heater." Three time slots appear. She taps "2."	**VO:** "With BuzzCall, they get a text back in seconds, tell you the problem, and pick one of your open times."
14–19s	Stripe pay screen, "$49 deposit, credited to your bill." Tap. "Booked ✓".	**VO:** "And they pay a $49 deposit toward the bill."
19–24s	Back under the sink. Plumber's phone buzzes: **"BOOKED + PAID $49: Maria, leaking water heater, Tue 8am."** He grins.	**VO:** "Then your phone buzzes: booked and paid. Before you're off the ladder."
24–30s	Logo + "Same number. No app. Done for you. Free 14-day pilot." + trybuzzcall.com + your phone.	**VO:** "Same number, no app, we set it up. Try it free for 14 days. TryBuzzCall dot com."

Shoot notes: use the real demo line so the screens are genuine. Use a friend as the homeowner, not stock footage. Add captions (most people watch muted). Cut a 15-second version for Facebook/Instagram. Wait to claim "most people won't leave a message" until §13 is cited on the website. (Invoca: under 3% of voicemail callers leave a message.)

6.2 Facebook ideas (local trade groups + your page; check each group's promo rules)

1. **"We called 50 [County] plumbers after 6pm."** Your own audit results, no shop names.
2. **Weather-triggered posts:** when a hard freeze is forecast, post: "Freeze warning Tuesday night. Plumbers, here's the exact text your missed callers will get [screenshot of the frozen-pipe script]." The same idea works for "no heat" in a cold snap (HVAC) and "AC out" in a summer heat wave.
3. **"Worst missed call" thread:** ask owners for their worst lost-job story. It drives comments and gives you objection research.
4. **Behind the scenes:** a 20-second clip of an in-person setup at a shop (with permission). "Setup took 20 minutes. He kept his number."
5. **Pilot recap screenshots:** weekly recap text with real numbers and the caller names blurred (§7).
6. **The founder story:** "Atlanta guy, bootstrapped, building this for 1–5-truck shops. Here's why." Honest, short, one photo.
7. **Myth-buster:** "'Customers hate deposits.' Here's how the $49 works: it's credited to their bill, there's a callback option, and refunds are clear."

6.3 Google Business Profile ideas

For TryBuzzCall's own profile (service-area business, since you set up shops in person; check Google's eligibility rules):

- Categories: closest fit for a software or marketing service. List service areas (counties).
- Weekly posts: demo video, freeze/heat script, case-study snippet, "Founding Shop spots left: X" (real number).
- Ask every pilot for a Google review after their first paid booking, using a direct review link.
- Seed the Q&A with real questions you've heard ("Do I keep my number?" "Who gets the deposit?").

For client shops (a value-add during setup):

- Add "Text or call: we reply in seconds" to their GBP description *only if accurate.*
- Make sure the GBP phone number is the line forwarded to BuzzCall.
- A GBP post when they turn on emergency scripts: "Frozen pipe? Call anytime. If we're on a job, you'll get a text to book right away."

7. Proof engine: pilots → case studies → recaps

Before the pilot (baseline)

- Ask: "Roughly how many calls a week do you miss? What's an average service call worth? What's the most you've lost from one missed call?" Write down *their* answers and label them owner estimates.
- Get written permission in the pilot agreement to use first name, shop name, city and anonymized results. Separate checkbox for photo/video.

During the pilot (instrumentation)

- From logs: missed calls caught, replies, bookings, deposits paid, urgent flags, "callback" requests, STOPs, owner callback time.
- **Day 3 check-in** (5-minute call): "Anything sound off in the wording?"
- **Screenshot the first BOOKED + PAID alert** (blur the caller's name and number). This is your best asset.

Day 14 wrap (the close)

- Send the pilot recap text (existing template), then sit down in person: "Here's what it caught, here's what it booked, here's what's already in your Stripe." Close on the guarantee and the Founding Shop rate.

Case study template (one page, 150 words, real numbers only)

> **[Shop], [City]: [X] paid jobs in [Y] days** *Before:* [owner's words about missed calls] *What we set up:* same number, frozen-pipe script, 20-min setup *Results (from BuzzCall logs, [dates]):* [X] missed calls caught · [X] booked · $[X] in deposits *Quote:* "[real quote]" ([first name], with written permission)

Recap loop (keeps shops subscribed)

- Weekly owner recap text (exists): calls caught · jobs booked · deposits.
- **Monthly "money found" text:** "This month BuzzCall booked [X] paid jobs. Your $49 + $[lead fees] brought in $[deposits] in deposits alone." Real numbers only.
- **Quarterly in-person visit** for annual shops: coffee, numbers, ask for a referral.

Proof rules: never show sample numbers as real. Never use a quote without written permission. Never show caller names or numbers. Keep placeholders in brackets until real data exists (matches the existing outreach kit).

8. Pricing psychology & ROI

ROI one-liner (illustration):

> **"One recovered $300 job pays for about 6 months of BuzzCall."** *Math, illustration only:* $300 job − its $12 lead fee = $288; $288 ÷ $49/mo ≈ 5.9 months. $300 is an example job value, not a measured average. Use the owner's own average ticket in conversation.

Tactics

1. **Anchor on the job, not the software.** Always compare $49 with one service call, never with other apps.
2. **"You pay $12 after you've already been paid $49."** The lead fee comes out of money the deposit already put in their pocket. That's the most persuasive line in the model.
3. **Same number as the deposit.** "$49 a month, the same as one deposit." Easy to remember.
4. **Risk reversal stack:** free 14 days → paid job in 30 days or the month is free (suggestion) → no contract on monthly.
5. **Annual = setup waived.** Pitch in January ("lock it in before AC season"), never during the pilot.
6. **Scarcity that's true:** "10 Founding Shop spots." Show the real remaining count.
7. **Simplicity:** one plan. No tiers until 20+ shops ask for something different.
8. **Lead-fee cap** (suggestion) to answer "what if it gets expensive?"

Decide before launch:

- Who pays Stripe processing on the $49 deposit? Recommend the shop (it's their revenue), disclosed up front.
- Define "paid lead" in writing (deposit cleared, not refunded because of shop cancellation, counted once per job).
- **Retire the old pricing:** the site, pitch sheet and `outreach_texts.md` say "$79–149/mo, setup from $99," and `docs/OUTREACH_SMS.md` #4 says "from $79/mo." Update all of them to $49/mo + $12 per paid lead.

9. Metrics to track (one Google Sheet, updated every Friday)

Stage	Metric	Goal / benchmark
Outreach	Shops contacted / week	25–45 (plan §4)
	After-hours no-answer rate (your own audit)	Measure; use in content

Stage	Metric	Goal / benchmark
	Contact → conversation rate	Est. 20–25%; replace with real
	Demo-line calls / week	Track; best leading indicator
Sales	Conversation → pilot	Est. 30–40%
	Pilot agreed → live (days)	≤ 10 days (10DLC is the bottleneck)
	Pilot → paid	Est. 50%
Product (per shop)	Missed calls caught / week	Track
	Caller reply rate to text-back	Compare to the 99 Calls vendor figure of 32.7%
	Reply → booked → deposit paid	Track each step. The deposit step is the one to watch.
	"Callback" choices and STOP rate	High STOP = fix the wording
	Owner response time to urgent flags	Track
	Refunds / disputes	As close to 0 as possible
Business	Paying shops, MRR, paid leads/shop	§4 goals
	Monthly churn (logo)	Track from Month 2
	Cost to acquire a shop (spend ÷ new paid)	Track
	Referrals per paying shop	Goal: 1 in 3 shops refers someone in 90 days

10. How to beat competitors

Competitor type	Their strength	How BuzzCall wins	Don't
Built-in text-back (GoHighLevel agencies, Podium, Birdeye, Weave)	Bundled, cheap or "free" in a suite	They send a text; you deliver a **paid booking** and only charge extra when it happens. No suite, no contract, no dashboard.	Compete on features or price per text.
Field-service software (Jobber $29 add-on, Housecall Pro, ServiceTitan)	Already in the shop's workflow	**Don't fight.** Target shops *not* on these platforms.	Try to replace their software.
Operator (from $49/mo, text-back + booking + Stripe deposit)	Closest product, same entry price	Pay-per-paid-lead, guarantee, **in-person Georgia setup**, local emergency scripts, a human you can call.	Assume the product alone differentiates you.
BookedBack (targets Atlanta HVAC)	Local focus on HVAC	Lead with **plumbing** and suburbs/small GA towns. Beat them on presence (supply houses, PHCC).	Start a price war in intown HVAC.
CatchMissed ($79 + $149 setup), BeepBack ($79), TextedBack ($99–149), Truckbell	Simple text-back	Lower base price, no setup on annual, deposit + booking, guarantee.	Name them to prospects.
AI receptionists (Rosie, Goodcall, Smith.ai, $0–299)	Answer live with voice	"No robot on your phone": plain texts in your voice. The caller books and pays, and you only pay when they do.	Claim AI superiority.

Moats you can build in 90 days: (1) in-person relationships in 2–3 counties, (2) real local case studies, (3) Georgia weather scripts and timing, (4) partner network, (5) the pay-per-paid-lead promise. None of these depends on features a big platform can copy in a sprint.

11. Risks & how to handle them

Risk	What could go wrong	Mitigation
TCPA (your own sales outreach)	Cold texts to owners' cell phones without consent can bring legal claims. Many small-shop "business lines" are personal cells.	**Don't cold-text prospects.** Call (manually, 8am–9pm local), email, or walk in. Text only after they text you, call the demo line, or say "text me," and log that consent. Keep an internal do-not-contact list and honor it immediately. **Revise `outreach_texts.md` §1 ("Cold SMS")** so it's used only with prior consent or a relationship. Get a one-time review from a TCPA-savvy attorney before scaling. (This is not legal advice.)
TCPA / content (the product's texts)	Text-backs that drift into marketing, or texts to people who didn't call.	Text only numbers that just called the shop. Keep messages transactional (booking). Include STOP/HELP. Rely on Twilio Advanced Opt-Out. Never add callers to promo lists.
A2P 10DLC	Registration delays (Twilio estimates under a week, sometimes longer), rejection, a per-shop cost of ~$20 (est.), and campaign suspension if a campaign is used outside its registered purpose (e.g., sales outreach on a customer-care campaign).	Register early. Match the campaign description to the real flow. Link to `sms-consent.html`, privacy and terms pages that are live on HTTPS. Keep one campaign per real use case. Never send prospecting texts through client campaigns.
"Keep your number" claim	With no-answer call forwarding, callers dial the shop's number, but the **text-back may come from a new BuzzCall local number**, not the shop's own number. The current kit says "a text from your number."	Say it precisely: "Customers still call your same number; the text comes from a local number set up for your shop." Or look into Twilio hosted SMS on the shop's existing number as an upgrade. Fix this wording before launch.
Deposit friction	Some callers won't pay up front, so bookings drop.	Keep the "callback" option. Track reply → deposit drop-off. Test a lower deposit or a "no deposit for existing customers" option if drop-off is high.
Refunds / chargebacks	Disputes on deposits; unclear who owns refunds.	Publish the refund policy (draft exists; attorney review). The shop's Stripe account takes the deposit. Waive the $12 when a deposit is refunded because of the shop.
Churn (seasonality)	Shops cancel in slow months or after one bad week.	Annual (setup waived), weekly recaps, monthly "money found" texts, seasonal scripts (freeze, no heat, heat wave), quarterly visits.
Founder bandwidth	Setup + support + sales by one person.	A setup checklist (exists), templated wording, setup limited to 20 minutes, batched setups on Fridays. Cap pilots at 4 live at once until the process is smooth.
Product reliability	Single-tenant JSON store, no retry queue: a missed buzz breaks trust.	Before pilot #3: multi-tenant config, error alerts to your phone, uptime check on `/health`, a daily "all good" self-test.
Copycats / price drops	Operator or GHL agencies match the pricing.	Compete on presence, proof and guarantee, not price.
Brand confusion	Assets say "bytspot"; the brand is TryBuzzCall/BuzzCall.	Use "BuzzCall (TryBuzzCall)" on every asset.

12. Before Day 1 checklist (launch blockers)

- ☐ Site live on HTTPS at trybuzzcall.com, with privacy, terms, SMS consent and refund pages
- ☐ Twilio upgraded from trial; demo number bought; TryBuzzCall 10DLC submitted
- ☐ Stripe account + test mode deposit flow working on the demo line
- ☐ All assets updated: **$49/mo + $12 per paid lead**, pilot terms, guarantee wording (if adopted), BuzzCall brand
- ☐ "Keep your number" wording corrected (see §11)
- ☐ `outreach_texts.md` §1 cold-SMS section restricted to consented contacts
- ☐ Pilot agreement with permission checkboxes and paid-lead definition
- ☐ Tracking sheet built (§2 and §9 columns)
- ☐ Emergency scripts: add **"no heat / cold snap"** for HVAC (only AC-out and frozen-pipe exist today)

13. Sources (the only outside statistics used)

- **Invoca:** 27% of home-services calls go unanswered; fewer than 3% of callers who reach voicemail leave a message.
- **99 Calls:** 32.7% reply rate to missed-call text-back (vendor-reported data).
- **Competitor pricing and positioning:** founder's own research, verified Oct 17, 2026 (GoHighLevel, Podium, Birdeye, Weave, Jobber, Housecall Pro, ServiceTitan, Operator, BookedBack, CatchMissed, BeepBack, TextedBack, Truckbell, Rosie, Goodcall, Smith.ai).
- **Fees and dates checked Oct 19, 2026 (re-check before relying on them):** Twilio A2P 10DLC fees (twilio.com/en-us/phone-numbers/a2p-10dlc); GA SOS license rosters (georgiasecretaryofstate.net) and license lookup (sos.ga.gov); PHCC of Georgia events calendar (phccga.org/events); CAAG Fall Seminar listing (caag.org).

Everything marked (est.) or "suggestion" is a judgment call for you to test, not a fact.
